

To Whom It May Concern
Dear Sir/Madam,

I'm an XM Radio subscriber/listener. In my opinion, XM satellite radio is the best thing to happen to radio.

My commute to work is 51 miles one way in the Chicago, IL area (takes me about 1 1/2 to 2 hrs)....and listening to XM satellite helps me with the traffic information I need during the rush hour. As we all know weather also affects how the traffic moves.this is another way the XM radio has helped.

I respectfully urge you and your office to reject the NAB's petition 04-160 in support of XM satellite radio to provide the kind of programming me and my fellow XM listener deserves.

Thank you for your time.

Yours truly,

Thomson Obasuyi
